

Project Executable Files

Date	10 July 2026
Team ID	xxxxxx
Project Name	Smart Lender – Loan Prediction System
Maximum Marks	3 Marks

Project Executable Files

This section requires submission of all executable and deployable files for your project. Ensure all files are properly organized, named, and uploaded to the specified submission platform. The evaluator must be able to run or deploy your solution using the provided files and instructions.

Step 1: Submission Checklist

S.No	Item to Submit	Submitted (Yes / No / NA)
1	Complete source code (all files and folders)	Yes
2	README / Setup Guide (instructions to run the project)	Yes
3	requirements.txt / package.json / dependency file	Yes
4	Database schema / seed files (if applicable)	NA
5	Environment configuration file (.env.example similar) or	NA
6	Deployed application URL (if hosted)	Yes
7	APK / Executable binary (if applicable for mobile/desktop apps)	NA
8	Dockerfile / Containerization config (if applicable)	NA
9	Test files and test results	Yes
10	Demo video or walkthrough (if required)	Yes

Step 2: File / Folder Structure

Provide an overview of your project's file and folder structure below:

```
Smart-Lender/
├── Dataset/
├── Documents/
├── Source_Code/
│   ├── app.py
│   ├── model_training.py
│   ├── requirements.txt
│   └── README.md
├── Static/
├── Templates/
├── .gitignore
└── README.md
```

Step 3: Deployment / Access Details

Field	Details
Hosted / Deployed URL	Not Deployed (Runs on Local Flask Server)
Login Credentials (Demo)	Not Applicable
Platform / Hosting Provider	Local Flask Server (Python Flask)
Repository Link	https://github.com/kusuma1227/Smart-Lender
Demo Video Link	https://drive.google.com/file/d/1DBGW5vRhQRIM3vPJUJyCulsDcvxW7DTd/view?usp=drive_link

Step 4: Run Instructions

Provide clear, step-by-step instructions for the evaluator to run your project locally:

1. Clone the GitHub repository.
2. Open the project in VS Code.
3. Navigate to the Source_Code folder.
4. Install dependencies using `pip install -r requirements.txt`.
5. Run the application using `python app.py`.
6. Open `http://127.0.0.1:5000` in a web browser.

Pre-requisites:

[List required software, versions, and system requirements]

Step 1: [e.g., Clone the repository: `git clone <url>`]

Step 2: [e.g., Install dependencies: `pip install -r requirements.txt`] Step

3: [e.g., Configure environment: copy `.env.example` to `.env`] Step 4:

[e.g., Run database migrations: `python manage.py migrate`] Step 5:

[e.g., Start the application: `python manage.py runserver`] Step 6:

[e.g., Open browser at `http://localhost:8000`]

Step 5: Known Issues / Limitations

S.No	Known Issue / Limitation	Workaround / Status
1	Project is not deployed online	Run locally using Flask
2	User authentication is not implemented	Planned for future enhancement
3	Uses a static CSV dataset	Can be upgraded to a database in future
