

Project Demo Planning

Date	10 July 2026
Team ID	XXXXXX
Project Name	Smart Lender Loan Prediction System
Maximum Marks	1 Mark

Project Demo Planning:

A well-structured demo plan ensures that the team presents the project effectively, covering all key aspects in a clear and organized manner. This document outlines the plan for demonstrating the project, including the flow of the demo, key features to highlight, and responsibilities of each team member.

S.No	Demo Section	Description	Duration (mins)	Responsible Member
1	Introduction	Introduce the project, team members, objective, and problem statement	2	Team Leader
2	Solution Overview	Explain the system architecture, technology stack, and Machine Learning workflow.	3	Team Leader
3	Live Application Demonstration	Demonstrate the Smart-Lender web application by entering applicant details and predicting loan approval status.	5	Team Leader
4	Machine Learning Model	Explain dataset preprocessing, model training, and prediction process	3	Team Member
5	GitHub Repository & Documentation	Showcase the GitHub repository, project structure, and documentation.	2	Team Leader
6	Conclusion & Future Enhancements	Summarize the project and discuss future improvements.	2	Team Leader

Demo Flow Summary:

Step	Activity	Notes
1	Introduction & Problem Statement	Introduce the Smart-Lender project, team members, and explain the challenges in traditional loan approval systems.
2	Solution Overview	Explain the proposed solution, system architecture, technology stack (Flask, Python, Scikit-learn, HTML, CSS, Bootstrap), and Machine Learning workflow.
3	Live Feature Demonstration	Run the Flask application, enter applicant details, perform loan prediction, and display the result (Loan Approved/Rejected). Also show the GitHub repository and project documentation.
4	Q&A Session	Answer mentor questions regarding the Machine Learning model, project implementation, technologies used, and future scope.
